

**Cloud based services to keep you connected “all ways” without the hassle and expense of maintaining equipment on site.**

**With our services you can:**

- Easily manage your services anytime, anywhere or have us manage it for you.
- Integrate our communications services into your business process.
- Have predictable fixed monthly costs.
- Connect multiple locations and remote employees.
- Keep your systems up to date with automated upgrades and feature releases.

# Our Services

## Cloud Hosted Voice Services

Use your internet connection and the power of the cloud to provide your business with feature-rich voice solutions - usually with more reliability and lower costs.

## Business SIP/VOIP Services

Replace your old style connection to your telephone with SIP Trunking. Rather than using a dedicated circuit for your calls, we connect your system to the public internet.

## Mobility Voice Services

Bring all the features of your business desk phone to your mobile phone, tablet and or desktop.

## Local Installation, Delivery & Support

We provide the local support and additional support across the country with our dealer network.

## Hosted Video Surveillance Service

Any business, large or small, can leverage our on-demand, multi-device, cloud surveillance solution using our latest technology of IP cameras and cloud storage.

## Internet and Data Services

Fiber, Broadband, Fixed Wireless and LTE internet provided by local, national and international providers. WAN and MPLS data services also available locally and across the globe.

## Web and Voice Conferencing

With our solution you can easily deliver online presentations conducting audio and video conferencing or simply using a desktop screen for client support.

## Call Center Solutions

Our call center provides you with the real-time metrics required for a cost effective solution.

## SMS Integration

Customers can use SMS text messaging to connect with your business to find your location, hours or connect with customer service.
