## Carrier and Data Network Support

Unicom will coordinate installation of carrier facilities with the end user to define the parameters for carrier facilities being installed as well as participating in the turn up of the facilities to ensure proper operation. Further, Unicom will participate in discussions related to the installation of Unicom products on the end user internal network to define the requirements for implementing our products on your network(s).

In the event the end user experiences issues with their carrier facilities or internal network once service has been established, Unicom will work with the end user carrier or IT personnel to determine the cause of the event. If the issue is related to the Unicom provided hardware we will remedy the situation. If the problem is determined to be the result of the carrier or customer network, the end user will be advised of the situation and advised that their IT personnel or the carrier will be responsible for remedying the problem.

Unicom can, at the request of the end user, remain in the discussion and actively participate on behalf of the client to resolve network and/or carrier issues at standard hourly maintenance rates(\$125.00 per hour). Once network or carrier issues have been identified to not be Unicom issues, Unicom will not troubleshoot, test or accept the lead responsibility for resolution of issues not related directly to Unicom products without prior written agreement.
