

Business SMS

Text messaging (SMS and MMS) is the most used data service in the world. Usage is not limited by age, economics, or geographic location. Texting is as much a part of the consumer market as is integral to social and personal communications.

In the future, not having the ability to communicate with your customers and prospects using Business SMS will be the equivalent of not having company email or a company website today.

Features

- Send and receive messages to and from extensions or 10-digit local or long distance numbers.
- Message colleagues, clients, and departments with a business identity even from personal devices.
- Reply to an incoming message from a mobile app, desktop, or by email.
- Text seamlessly across devices, including smartphones, tablets, and computers.
- Collaborate more effectively by communicating in a single text thread.
- Send / receive images, videos, and files.

Benefits

- Inbound messages are no longer stuck on someone's personal mobile device.
- You can respond to messages from the SMS Console as easily as responding to an email.
- Automatically respond to common questions with consistent answers, driven by the power of Artificial Intelligence (AI) controlled bots.
- Send Outgoing messages from your Main Business number, reinforcing your brand and number to customers and prospects.
- Broadcast messages to multiple numbers at once.
